Traffic Safety Measures and Assessment

Message from the Guest Editors

The number of casualties caused by traffic accidents has grown significantly in recent years. More importantly, road traffic crashes frequently involve regular road users such as pedestrians, cyclists, and motorcyclists and have thus become one of the world's largest issues linked to public health and injury prevention. In this Special Issue, we will explore new technologies and methodologies to identify contributing factors to crashes and implement potential countermeasures. Particular attention will be paid to studies that address the use of big data in road safety management. If you are interested in this topic, you are welcome to contribute to this Special Issue. I look forward to receiving your submissions soon.

Guest Editors

Dr. Juan Li

School of Traffic and Transportation, Beijing Jiaotong University, Beijing 100044, China

Dr. Bobin Wang

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
