

Special Issue

Laser and Silicon Photonics: Technology, Preparation and Application

Message from the Guest Editors

The development of laser technology has advanced human society into the photonic era, with silicon photonic technology having become the future development trend. This Special Issue of the *Applied Sciences* journal aims to broadly cover advanced laser technology, silicon photonics technology, their cross-integration and improve device performance through innovative chip design, preparation process or method, expected to be applied to emerging technologies such as the Internet of Things, laser communication, artificial intelligence, autonomous driving, life sciences and laser spectroscopy. For this Special Issue, we invite you to submit recent results related to "Laser and Silicon Photonics Technology: Preparation and Application". Experimental research and comprehensive review papers are welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
