

Special Issue

Toward the Green Electromobility Paradigm through Artificial Intelligence Applications

Message from the Guest Editors

This Special Issue is intended to collect research articles or reviews that address artificial intelligence applications in the transport industry, especially green electromobility. This Special Issue includes but is not limited to the following topics:

- Machine learning algorithms for the transport industry;
- The interaction between humans and machine through biometric recognition;
- Effective management tools and accurate data on which decisions can be made;
- Process automation;
- Development of virtual assistants;
- Language technology and natural language processing;
- The process of converting spoken words into digital format in order to transcribe them into useful code for various software applications useful in the transport industry;
- Neural networks applied to the transport industry;
- Intelligent 5G technology for the transport industry;
- Current and future trends in applications of intelligent electromobility.

Guest Editors

Dr. Raluca Andreea FELSEGHI

Faculty of Electrical Engineering and Computer Science, "Ștefan cel Mare" University of Suceava, 720229 Suceava, Romania

Dr. Maria Simona Raboaca

ICSI Energy Department, National Research and Development Institute for Cryogenics and Isotopic Technologies, 240050 Ramnicu Valcea, Romania

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
