Message from the Guest Editors

Dear Colleagues,

With the advent of sexbots, AI and robotics have entered the more intimate domains of human-machine relationship and a highly sensitive cultural territory, now challenging the most primal and elemental aspects of human existence.

Meanwhile, human-to-human marriage rates continue to decline; and assisted reproductive technology is becoming increasingly routine, enabling procreation without a marital or even sexual partner.

While the trinity of "marriage, sex and co-parenting" will continue to dominate for a long time to come, these developments are portending new alternatives, with potentially profound social consequences. They also provide a new context for the examination, expression, celebration and contemplation of human sexuality, from multiple points of view.

From ancient mythology to virtual reality, from feminism to sexology, from Kama Sutra to Ex Machina, from neuroscience and evolutionary biology to behavioral psychology and cultural anthropology … we welcome papers, reviews, images and artworks, etc. from wide-ranging fields and perspectives, on the subject of human sexuality and intimacy.

Design, Savannah, GA 31402, USA

Message from the Editor-in-Chief

Arts welcomes scholarly contributions that address fundamental issues in the arts, broadly conceived, from any meaningful perspective—theoretical, historical, interdisciplinary, and global. Submissions are expeditiously and rigorously reviewed by peers, in order to insure the highest scholarly standards. Because *Arts* is an online journal, articles reach their desired audiences more quickly and reliably than its print media peers. The future is digital, and *Arts* combines the stringent scholarly standards of traditional journals with the easy accessibility afforded by digitalization.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within ESCI (Web of Science), and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 35.5 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2024).
