Australia

Deadline for manuscript
submissions:

30 December 2024

Message from the Guest Editor

This Special Issue aims to present original research articles and reviews in order to provide solid new findings with regard to the health impacts and inequity of climate change and air quality. Topics to be covered include, but are not limited to, reviews and original research in: (1) climate change, air pollution, and health outcomes from biomarkers to mortality; (2) the health inequity of climate change and air pollution across populations and geographic regions; (3) new methods for exposure assessment; and (4) the evaluation of policies targeting the mitigation and adaptation of climate change and air pollution.

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
