Deadline for manuscript  
submissions:

**closed (14 August 2024)**

### Message from the Guest Editor

Dear Colleagues,

Several countries in East Asia have experienced rapid economic development. The growth and change in industrial structure led to increased air pollution, which became a serious issue.

The purpose of this Special Issue is to act as a platform for the exchange of research insights related to air pollution in East Asia. Areas of interest in this Special Issue include, but are not limited to, the following topics:

- Air quality measurement technology;
- Air pollution source apportionment;
- Emission inventory and air quality modeling;
- Hazardous air pollutants and health effects;
- Air pollutant management and control;
- Secondary air pollutant (O<sub>3</sub> and PM<sub>2.5</sub>) formation mechanisms.

We look forward to receiving your contribution!

Dr. Jin-Seok Han

## Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

**Journal Rank:** CiteScore - Q2 (Environmental Science (miscellaneous))
