

## Agrometeorology

Guest Editors:

**Dr. Demetrios E. Tsesmelis**

**Dr. Nikolaos Skondras**

**Dr. Nikolaos Proutsos**

Deadline for manuscript submissions:  
**closed (25 August 2022)**

### Message from the Guest Editors

This Special issue focuses on agrometeorology aspects. Topics of interest include but are not limited to:

- Micrometeorology and micrometeorological measurements;
- Evapotranspiration and other mass and energy fluxes;
- Radiation availability for photosynthesis and optical characteristics of plants;
- Radiation distribution in canopies;
- Droughts and impacts on plants;
- Agricultural water management;
- Irrigation management;
- Weather factors' effect on phytopathology and plant diseases;
- Harmful organisms;
- Effects of temperature and water availability on plants and animals;
- Weather impact on honey production and bees' behavior and productivity;
- Impacts of climate and climate change on forests and agricultural crops;
- Relations between climate attribute and biodiversity;
- Hydrological processes;
- Evapotranspiration models and evaluation;
- Agroclimatology;
- Comparison of biometeorological and bioclimatic indices;
- Methods and data validation;
- Remote sensing and crop modeling;
- Ecosystems and climate change;
- Aridity and changes of climate;

atmosphere

- Impacts of vegetation on rural microclimate;
- Changes in phenology of plants and animals;
- Plant ecophysiology.

an Open Access  
Journal by MDPI

## Editor-in-Chief

### Dr. Daniele Contini

Institute of Atmospheric Sciences  
and Climate (ISAC), National  
Research Council (CNR), Str. Prv.  
Lecce-Monteroni km 1.2, 73100  
Lecce, Italy

## Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

**Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
