Deadline for manuscript submissions:

**closed (30 September 2023)**

### Message from the Guest Editors

Dear Colleagues,

It is our pleasure to announce this new Special Issue on “Wind and Precipitation—Climatic Influence on the Mediterranean Basin”, to be published in the Section “Atmospheric Techniques, Instruments, and Modeling” of *Atmosphere*.

The Special Issue is focused on forecasts and analyses of meteorological events characterized by winds and precipitations in the Mediterranean region. Studies may cover a large range of time scales, ranging from nowcasting to climatological scales. We are inviting the submission of papers concerning different aspects ranging from local to global scales, covering single case studies of relevant interest as well as several case studies distributed over a large range of time accounting for seasonal or long-range variability.

The main goal of the issue is to upgrade knowledge of phenomenological events within the context of the climate characterizing the Mediterranean basin.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

**Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
