Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editor

Dear Colleagues,

The Special Issue is the second volume of the series of publications dedicated to “Aircraft Interaction with Lightning and Thunderclouds” (https://www.mdpi.com/journal/atmosphere/special_issues/aircraft-interaction-with-lightning-and-thunderclouds)

We pursue an understanding of the interaction between flying electrically floating objects with electrostatic electric fields, such as those generated by thunderclouds. The Special Issue is therefore focused on collecting experimental and theoretical knowledge about the following phenomena:

1. Lightning strikes on airplanes, helicopters, drones, UAVs, etc.
2. Lightning damage tests on novel materials used in space and aviation.
3. Aircraft interactions with thundercloud electric fields.
4. High-energy radiation from lightning and thunderclouds and potential hazard to avionic equipment and passengers.
5. Laboratory studies on long sparks and charged aerosol clouds.
6. Simulations and theoretical work on atmospheric electric discharges in general.

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
