Message from the Guest Editors

This Special Issue aims to publish selected papers from the third conference "Air quality and health" (May 29–May 1, 2021, Wrocław), implemented under the LIFE-MAPPINGAIR/PL Project.

Conference

Topics include, but are not limited to, the following:

- Air pollutants and their sources;
- Dispersion of air pollutants and air quality modeling;
- Influence of air quality and biometeorological conditions on human health;
- Air quality assessment for epidemiological studies;
- Indoor air quality;
- Environmental risk assessment;
- Influence of meteorological conditions on air quality;
- Socioeconomic problems related to air quality;
- Ecological education;
- Legal aspects of activities related to the improvement of air quality;
- Air quality monitoring.

These topics are only examples. Other emerging topics in this field of science are also welcome.

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
