Message from the Guest Editor

Dear Colleagues,

Biometeorology, an interdisciplinary science that studies the interaction between the biosphere and its atmospheric environment, has become of increasing importance given observed and projected changes in the climate system. Acknowledging this importance, the journal *Atmosphere* plans to debut a special issue on Biometeorology. The theme of this issue is ***Vegetation and Climate Variability/Change***. Original studies encompassing any topic in this theme are welcome for submission. All studies must contain a specific section on uncertainty analysis and discussion. Researchers are welcome to contact the Editor before submitting their manuscripts.

Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases.

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
