Deadline for manuscript submissions: closed (30 June 2017)

# Message from the Guest Editor

Dear Colleagues,

Approximately 54% of the world's population lives in urban areas today, and this proportion is expected to increase to 66% by 2050. There is a great need to advance our scientific understanding of air pollution in urban areas to improve air quality and protect public health. This Special Issue invites submissions of novel and original papers and reviews on urban air pollution, including but not limited to the following topics:

- Quantification of pollutant emissions at urban scales
- In situ and satellite-based observations of trace gases and particulates
- Chemical transformations
- Air pollution meteorology
- Air quality modeling
- Pollution transport between urban and regional scales
- Pollution control measures and policies

Environmental, Occupational, and Geospatial Health Sciences, CUNY School of Public Health, New York, NY 10027, USA

### Message from the Editor-in-Chief

Continued developments in instrumentation and modeling have driven atmospheric science to become increasingly more complex with a deeper understanding of concepts, mechanisms, and interactions. This is the field that innovation built and it has led to a better appreciation for the complexity with atmosphere. Human life is intertwined in this complexity as we strive to better understand our atmosphere. Climate change is constantly stretching the limits of our thinking and forcing new ideas and concepts to be played out. Welcome to the Anthropocene!

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, Inspec, CAPlus / SciFinder, Astrophysics Data System, and other databases. **Journal Rank:** CiteScore - Q2 (*Environmental Science (miscellaneous)*)
