

Special Issue

Hearing Impairment: Neurocognitive Consequences and Brain Plasticity

Message from the Guest Editors

Hearing impairment is a challenging societal health problem. Modern prosthetic devices such as cochlear implants and hearing assistive technology bring promising and exciting opportunities for auditory rehabilitation to individuals with hearing loss.

The purpose of this special issue is to provide an open-access peer-reviewed forum that can bring international experts from related disciplines together to showcase new developments in this active research area of hearing impairment with an emphasis on the nature of neurocognitive consequences and brain plasticity in younger as well as older individuals. This special issue welcomes original studies, review and perspective articles, technical notes, and case studies with basic, clinical or translational research questions. We also welcome basic research on normal-hearing listeners that have significant implications on neural plasticity of the auditory system as a function of auditory training and experience.

Guest Editors

Prof. Dr. Yang Zhang

Prof. Dr. Seiji Nakagawa

Prof. Dr. Gavin M Bidelman

Prof. Dr. Anu Sharma

Dr. Chieh Kao

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Giacinto Asprella Libonati
ENT Unit, Santa Maria delle Grazie Hospital, ASM Matera, 75100
Matera, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Audiology and Speech-language Pathology) /
CiteScore - Q2 (Otorhinolaryngology)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.2 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2025).
