### Message from the Guest Editors

Dear Colleagues,

This Special Issue will bring together the state-of-the-art results obtained in sustainability theory, decision making theory, mathematical control problems and their multidisciplinary applications, including with the use of artificial intelligence. Topics include but are not limited to:

- nonlinear systems
- stability
- perturbation
- impulsive systems
- approximation
- numerical methods
- control
- decision making theory
- machine learning

## Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High visibility:** indexed within **SCIE (Web of Science)**, **dblp**, and other databases.

**Journal Rank:** JCR - Q1 (Mathematics, Applied)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
