

Fuzzy Set Theory and Its Applications in Decision Making II

Guest Editor:

Dr. Sarfaraz Hashemkhani Zolfani

School of Engineering, Catholic University of the North, Larrondo 1281, Coquimbo, Chile

Deadline for manuscript submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

Following the success of our first Special Issue on [Fuzzy Set Theory and Its Applications in Decision Making](#), we are excited to announce the second volume in this series. The previous Special Issue attracted a wide range of high-quality submissions, highlighting innovative applications and advancements in fuzzy set theory across various domains. Building on this momentum, the second volume aims to further explore and expand the theoretical and practical applications of fuzzy set theory in decision making under uncertainty.

Fuzzy set theory continues to be a cornerstone in addressing uncertainties inherent in decision-making processes. Its versatility and robustness make it indispensable for modeling and solving MCDM (Multiple Criteria Decision-Making) problems. This Special Issue will focus on both the mathematical foundations and the application of fuzzy set theory in solving real-world decision-making challenges.

We invite researchers and practitioners to submit original research articles, comprehensive reviews, and insightful case studies that reflect fuzzy set theory's latest advancements and applications in decision making and optimization.

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **SCIE (Web of Science)**, **dblp**, and **other databases**.

Journal Rank: JCR - Q1 (Mathematics, Applied)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
