### Message from the Guest Editor

Dear Colleagues,

We invite both specialists of function theory and specialists in the related fields of mathematics to publish the results of their research in this Special Issue. We welcome both original and review research articles concerning the latest research on function theory, as well as its applications. Topics include, but are not limited to, the following:

- theory of functions of a real variable
- approximation theory
- asymptotic analysis
- approximation of solutions of differential and integral equations
- trigonometric polynomials, inequalities, and extremal problems
- harmonic analysis
- theory of functions of complex variables
- analytic functions and their generalizations
- entire and meromorphic functions
- applications involving function theory of real and complex analyses

## Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High visibility:** indexed within [SCIE \(Web of Science\)](#), [dblp](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Mathematics, Applied)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
