closed (30 September 2022)

Message from the Guest Editor

As is known, artificial intelligence, robotics and biotechnology have been transforming the current business world, and there will be fundamental changes in the way we live, work and communicate in the future. Right now, the digital financial services brought about by information technology enhance the traditional financial services, such as various methods of digital payment, accommodation and investment services. It is clear that the future development of emerging technology and financial service strategy (financial technology, FinTech) has become increasingly diversified, which will further affect the development of financial services. In this Special Issue, we will collect the papers related to the patterns, algorithms, and applications of artificial intelligence in financial services.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Humberto Bustince

Department of Statistics,
Computer Science and
Mathematics, Public University of
Navarra, 31006 Pamplona, Spain

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within SCIE (Web of Science), dblp, and other databases.

Journal Rank: JCR - Q2 (Mathematics, Applied)
