154, 11000 Belgrade, Serbia

Deadline for manuscript
submissions:
closed (30 September 2021)

Message from the Guest Editors

Decision making on real world problems, including individual process decisions, requires an appropriate and reliable decision support system. Fuzzy set theory, rough set theory and neutrosophic set theory, which are MCDM techniques, are useful for modeling complex decision making problems with imprecise, ambiguous or vague data.

This Special Issue on "Multiple Criteria Decision Making" aims to incorporate recent developments in the area of the multi-criteria decision making field. Topics include, but are not limited to:

- MCDM optimization in engineering;

- Environmental sustainability in engineering processes;

- Multi-criteria production and logistics processes planning;

- New trends in multi-criteria evaluation of sustainable processes;

- Multi-criteria decision-making in strategic management based on sustainable criteria.

Computer Science and
Mathematics, Public University of
Navarra, 31006 Pamplona, Spain

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: indexed within SCIE (Web of Science), dblp, and other databases.
Journal Rank: JCR - Q1 (Mathematics, Applied)
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
