IMPACT FACTOR 1.9

Soft Computing in Economics, Finance and Management

Guest Editors:

Dr. M. Glòria Barberà-Mariné

Dr. Cristina Ponsiglione

Dr. Maria Teresa Sorrosal-Forradellas

Prof. Dr. Giuseppe Zollo

Deadline for manuscript submissions:
closed (30 November 2020)

### Message from the Guest Editors

The focus of this Special Issue will be the application of soft computing methods to analyze or solve issues in the different domains of economics and business. This will provide an opportunity to study and discuss how these methodologies offer effective solutions to cope with the increasing complexity of markets and organizations. Among the topics that this Special Issue will address, we may consider the following non-exhaustive list, with its applications to economics, finance and management:

- Agent-Based Modelling and Simulation
- Chaos Theory
- Competencies Management and Soft Computing Methods
- Complex Adaptive Systems
- Complexity Science
- Data Mining
- Decision Making Systems
- Evolutionary Modelling
- Fuzzy Expert Systems
- Fuzzy Games Theory
- …

Needless to say, the Special Issue is open to receiving further ideas, apart from the aforementioned topics.

In the hopes that this initiative will be of interest, we encourage you to submit your current research to be included in the Special Issue.

Department of Statistics,
Computer Science and
Mathematics, Public University of
Navarra, 31006 Pamplona, Spain

Message from the Editor-in-Chief

Axioms is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: indexed within SCIE (Web of Science), dblp, and other databases.
Journal Rank: JCR - Q1 (Mathematics, Applied)
