**Dr. Martina Petranikova**

Department of Chemistry and  
Chemical Engineering, Industrial  
Materials Recycling, Chalmers  
University of Technology,  
Kemivägen 4, 412 96 Göteborg,  
Sweden

### Message from the Guest Editors

The supply and management of energy are at the center of our daily concerns and represent a socio-economic priority. Energy storage devices will increasingly be needed, not only for portable electronic device usage, but also for electrical vehicle fleets and renewable energy applications. Battery systems should store surplus electricity from the smart grid for hours, days, and even weeks, if necessary, because electricity generation from renewable sources fluctuates with weather conditions. Likewise, the replacement of internal combustion cars by electric vehicles to reduce the carbon dioxide emissions and to limit our dependence towards fossil fuels stimulate the search for energy storage devices including batteries, fuel cells, electrolysis for hydrogen production, pumped-storage power plants, etc...

Deadline for manuscript  
submissions:

**closed (31 January 2019)**

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Karim Zaghib**

Department of Chemical and  
Materials Engineering, Concordia  
University, Montréal, QC H3G  
1M8, Canada

## Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Electrochemistry) / CiteScore - Q2 (Electrical and Electronic Engineering)
