

## Recycling and Reuse of End-of-Life Lithium-Ion Batteries: Challenges and Strategies

Guest Editors:

### **Dr. Chiara Ferrara**

Department of Materials Science,  
University of Milano-Bicocca, Via  
Roberto Cozzi, 55, 20125 Milano,  
MI, Italy

### **Prof. Dr. Elza Bontempi**

INSTM and Chemistry for  
Technologies Laboratory,  
Department of Mechanical and  
Industrial Engineering, University  
of Brescia, Via Branze 38, 25123  
Brescia, Italy

Deadline for manuscript  
submissions:

**25 October 2024**

### **Message from the Guest Editors**

The Special Issue presents contributions addressing, but not limited to, these major topics, defining protocols and strategies, highlighting challenges, and identifying possible routes for the management of the various aspects involved in the recycling and reuse of lithium-ion batteries.

- Protocols for pre-treatments, cell discharge, and cell disassembly at laboratory and industrial scale;
- Protocols for the robust and fast analysis of the state of health and charge of the battery;
- Processes and materials for the degradation of battery components;
- Processes and materials for the recovery of critical/strategical raw materials through the isolation of target elements via separation, precipitation, and filtration;
- Upcycling and recycling of different components of waste lithium-ion batteries;
- Regeneration and healing of degraded battery components for their direct recycling;
- Assessment of the environmental and economical sustainability of all the above-mentioned aspects;
- New perspectives on the development of new-generation lithium-ion battery materials and design to enable easy recycling.

an Open Access Journal by MDPI

### Prof. Dr. Karim Zaghib

Department of Chemical and  
Materials Engineering, Concordia  
University, Montréal, QC H3G  
1M8, Canada

## Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Electrochemistry) / CiteScore - Q2 (Electrical and Electronic Engineering)
