Message from the Guest Editors

Dear Colleagues,

With the recent awareness of climate change and its associated issues, electrochemical energy storage systems (secondary batteries and super- or pseudocapacitors) are important and established technologies which have attracted significant interest from scientists and industries, owing to their excellent performance in various fields (e.g., portable electronics, electro-mobility, renewable energies). In all of these devices, carbon-based materials play a fundamental role as active materials, conductive agents, supporting scaffolds, etc.

For this Special Issue, we are seeking contributions that improve the knowledge related to the use of carbon-based materials in electrochemical energy storage systems, both in their conventional uses and in more innovative and unexplored ones.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Electrochemistry) / CiteScore - Q2 (Electrical and Electronic Engineering)
