Deadline for manuscript submissions:

20 November 2024

Message from the Guest Editors

Dear Colleagues,

The 9th Academic Conference on Key Materials for Supercapacitors and Batteries (August 9th-11th, 2024) aims to provide a welcoming environment for electrochemists to enjoy deep and open discussions. Over two days, electrochemical scientists and engineers will have the opportunity to network, establish new and long lasting collaborations, exchange ideas and generate novel ones, and be inspired by top-level keynote lectures, in order to further enhance the field of electrochemical energy storage and conversion research. In other words, this will be a setting where electrochemists can meet and discuss very scientific and/or technical aspects of our work involving supercapacitors and batteries. For this Special Issue, titled “Selected Papers from the 9th Academic Conference on Key Materials for Supercapacitors and Batteries”, we are calling for papers reporting the newest advances and scientific results in supercapacitors and batteries. In particular, submissions related to supercapacitors, metal-ion capacitors, rechargeable batteries, Li/Na-S batteries, Li-air (O₂) batteries, solid-state batteries, and fuel cells are particularly encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Electrochemistry) / CiteScore - Q2 (Electrical and Electronic Engineering)
