Special Issue

Transition Metal Complex for Electrochemical Energy Storage

Message from the Guest Editors

This Special Issue on “Transition Metal Complex for Electrochemical Energy Storage” is focused on the synthesis and structure design of transition metal compounds (involving chalcogenides, carbide, nitride, etc.) and their complexes as well as their application in the electrochemical energy storage field, including metal–ion batteries, supercapacitors, Li-S batteries, metal–air batteries and so on. Transition metal complexes have been broadly used as electrode materials and have great potential for development owing to their unique d-band structure and heterointerface. This Special Issue is designed to provide a platform for disseminating knowledge in this field and further promote the development of transition metal complexes in the electrochemical energy storage field. Keywords:

- transition metal compound
- hybrid electrode materials
- electrochemical energy storage
- heterointerface engineering
- electrochemical reaction mechanism
- surface engineering

About the Journal

Message from the Editor-in-Chief

Take the opportunity to publish your original scientific work or a review paper concerning battery materials, battery technology or battery application within this new open access journal. Along with material science, the journal also addresses engineering and multidisciplinary research topics, such as cell and system design or storage system integration. Publishing proffers visibility for the benefit of other experts and facilitates discussion of the research results within the field. You are invited to publish your work, read published papers and to participate in topical discussions.

Editor-in-Chief

Prof. Dr. Karim Zaghib
Department of Chemical and Materials Engineering, Concordia University, Montréal, QC H3G 1M8, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Electrochemistry) / CiteScore - Q1 (Electrical and Electronic Engineering)
