Message from the Guest Editor

Cultural differences are found in various psychological processes, including self-concepts, motivation, emotion, and cognition; processes underlying cultural differences in those psychological processes are also identified. Also, new perspectives on the conceptualization of psychopathology and on the definition of culture and how these are intertwined arise. Moreover, culturally sensitive assessment practices in psychopathology are identified, including multiple cultural identities of the patient, explanatory models of the psychopathology, psychosocial stressors and strengths, and the cultural features of the practitioner–patient relationship in the clinical encounter, being that clinical interaction is a cultural one. Concerning cultural differences, psychological research is usually based on WEIRD (Western, Educated, Industrialized, Rich, Democratic) participants. However, this group does not represent the majority of the world's population. Therefore, the challenge is to study populations from non-WEIRD countries, compare them with those from WEIRD countries, and theoretically justify the differences found.

Message from the Editor-in-Chief

With warm greetings, it is a pleasure to invite you to contribute a research article or comprehensive review for consideration and publication in *Behavioral Sciences*. *Behavioral Sciences* is an international, scientific, open access journal providing an advanced forum for discussions and research regarding the intersection between psychiatry, neuroscience, psychology, cognitive and behavioral sciences, and behavioral biology. More information are available at: <https://www.mdpi.com/journal/behavsci>. We would be pleased to welcome you as one of our authors and have the opportunity to consider your work for publication.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SSCI (Web of Science), PubMed, PMC, Embase, PsycInfo, and other databases.

Journal Rank: JCR - Q2 (Psychology, Multidisciplinary) / CiteScore - Q2 (Development)
