submissions:

closed (31 March 2024)

Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the latest advances in proteins and ncRNAs' interactions and functions. The topics of interest include, but are not limited to:

- Characterization of protein and RNA interactions.
- Description of ncRNA regulatory networks.
- Latest technical approaches to investigate protein and RNA function and localization.
- Databases to annotate interaction data sets.
- Bioinformatics tools to predict interactions or integrate data.

Editor-in-Chief

Prof. Dr. Yehia Mechref

Department of Chemistry and
Biochemistry, Texas Tech
University, Lubbock, TX 79409,
USA

Message from the Editor-in-Chief

BioChem is an international and interdisciplinary open access journal encompassing the fields of molecular biology, cell biology, structural biology, nucleic acid biology, chemical biology, synthetic biology, disease biology, biophysics, and theoretical biochemistry. It publishes reviews, research articles, communications, and letters. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.1 days after submission; acceptance to publication is undertaken in 5.1 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers: APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
