

Advances in Nanomaterials for Biosensing Application

Guest Editors:

Dr. Elena Dilonardo

Institute of Nanotechnology,
CNR-NANOTEC, c/o Department
of Chemistry, Università degli
Studi di Bari, Via Orabona 4,
70126 Bari, Italy

Dr. Maria Rachele Guascito

Department of Environmental
and Biological Sciences and
Technologies (DISTEBA),
University of Salento, 73100
Lecce, Italy

Deadline for manuscript
submissions:

31 January 2025

Message from the Guest Editors

At the global level, great advances have been achieved towards new approaches in biosensing and bioelectronic devices suitable for application in human health monitoring. Biosensors measure biological signals and convert them into electrical signals. As in many different technological fields, nanomaterials have demonstrated their appropriateness for biosensing applications. The smart use of such nano-objects has led to clearly enhanced performances with increased sensitivities and lowered detection limits of several orders of magnitude. Specifically, nanomaterials used as transduction elements in biosensing devices include nanoparticles with high stability and high carrier capacity, nanowires and nanorods that are capable of high detection sensitivity, carbon nanotubes with a large surface area and high electrical and thermal conductivity, and quantum dots with color tunability.

This Special Issue will focus on the evolution of biosensors, on the types of biosensors based on their receptors, transducers, and modern approaches employed in biosensors using nanomaterials, and the recent advances in biosensing technology with the expansion of nanotechnology.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
