submissions:

closed (15 February 2024)

Message from the Guest Editor

The aim of this Special Issue, entitled ‘3D-Printing Nanotechnology: Recent Advances in Biomedicine’, is to investigate the design of manufacturing systems, printing process control, and printed product analysis in 3D-printing nanotechnology for biomedical applications, addressing the fundamental research and multidisciplinary research in this area.

Potential topics include but are not limited to the following:

- Process control of 3D bioprinting nanotechnology;
- Nanomaterial patterning in 3D printing;
- 3D-printing biosensors;
- 3D-printing wearable electronics;
- 3D-printing nanotechnology in drug delivery systems;
- Integrating 3D printing with nanomaterials for tissue engineering.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
