

Cell-ECM Interactions for Tissue Engineering and Tissue Regeneration

Guest Editors:

Dr. Ngan F. Huang

Department of Cardiothoracic Surgery and Stanford Cardiovascular Institute, Stanford University, Palo Alto, CA 94305, USA

Dr. Brandon J. Tefft

Medical College of Wisconsin & Marquette University, Department of Biomedical Engineering, Milwaukee, WI 53226, USA

Deadline for manuscript submissions:

closed (15 December 2022)

Message from the Guest Editors

It is increasingly appreciated that the extracellular matrix (ECM) provides not only structural support, but also dynamic signaling cues that influence cellular behavior. In the context of tissue engineering and tissue regeneration, the ECM plays a critical role in many aspects, including the regulation of cell survival, cellular reorganization, contractility, as well as in the regulation of engineered cardiovascular tissue formation and function. This issue explores cellular interactions with naturally derived ECMs, biomimetic materials, and synthetic hydrogels. For example, the ECMs can take the form of 3D porous scaffolds, bioinks for 3D bioprinting, or decellularized ECMs. We invite manuscripts that focus on how cell-ECM interactions lead to advances in tissue engineering or in vivo tissue regeneration, as well as in the improved understanding of the underlying molecular biology.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
