Message from the Guest Editors

Dear Colleagues,

In dental medicine, tissue reconstruction has attracted an increasing amount of interest in oral and maxillofacial disciplines. Scaffolds, stem cells and biomaterials promise a bright future ahead in the treatment of craniofacial defects, clefts, TMJ disorders, tooth regeneration and periodontal problems. Additive 3D manufacturing technologies can also be used in oral and maxillofacial surgery. Pulp tissue regeneration, enamel and dentin development can also be attempted with these new emerging possibilities. Stem cells and/or scaffolds loaded with active growth factors can be commonly used in orthodontics to enhance orthodontic tooth movement and target the control of growth at the right time, with the desirable outcomes.

This Special Issue focuses on the most recent “Advances in Dental and Maxillofacial Tissue Engineering” . Original research contributions will be prioritized, but reviews about the state of the art, current limitations and future perspectives are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
