

Contribution of Smart Biosensors to the Future of the Health Care Services

Guest Editor:

Dr. Pau Redón Lurbe

Smart Sensors Laboratory-NUIG,
Galway, Ireland

Deadline for manuscript
submissions:

closed (30 September 2020)

Message from the Guest Editor

Recently, the design and development of sensors with new or improved capabilities has attracted interest and funding from academia and industrial partners. In the healthcare field, some of the key developments have related to the reduction of the noise-to-signal ratio for more accurate readings, the employment of new wearable or implantable biocompatible materials and the downsizing of these materials to ensure minimally invasivity. The coupling of these new technologies with machine learning or artificial intelligence algorithms have contributed to the enhancement of the sensor's capabilities, making them "smart".

We are designing a Special Issue that aims to give the reader an updated understanding of how "smart" biosensors will improve the future of healthcare services. Papers presenting relevant scientific, clinical, or technological advances in areas like clinical diagnosis, patient safety, patient management or reduction of health care expenditures are welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
