School of Dentistry, University of  
Mississippi Medical Center,  
Jackson, MS 39216, USA

Deadline for manuscript  
submissions:

**closed (31 October 2020)**

### Message from the Guest Editor

The cell–biomaterial interactions, such as three-dimensional orientation and architecture of cells, controlling cell–cell contact and communication with microscale resolution and directing cell behavior to achieve appropriate biological function, are critical to the development of the next-generation tissue engineering scaffolds. This Special Issue recruits original research papers and comprehensive reviews on all innovative developments that provide fundamental insights about cell–cell, cell–matrix, and cell–microenvironment interactions, including but not limited to the following topics:

- Integration of microstructural, mechanical, and compositional cues for engineering complex tissue systems;
- Substrate guided stem cell behavior;
- Interaction of specific cell types with materials;
- Modification of three-dimensional biomaterial scaffolds by grafting and patterning of small molecules, polymers, and/or ligands;
- Characterization methods to ascertain a successfully modified three-dimensional scaffold and cellular interactions with such scaffolds;
- New developments in materials that are responsive to environmental cues

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Engineering, Biomedical)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
