Message from the Guest Editors

Protein-based biomaterials have been of interest for many years, but there has been increased emphasis placed on their development as we have come to better understand the impacts synthetic materials have on the environment and our bodies. Improvements in scientific discovery have allowed for further development of these technologies by making it possible to better understand proteins' structures and functionality. These developments are providing researchers opportunities to create new, nature-inspired, protein-based biomaterials to help usher in a brighter future in the materials industry.

For this Special Issue, we invite critical reviews and novel research in the field of protein-based biomaterials. We particularly invite contributions related to the study of filament proteins, proteins studied for use as biomaterials, protein material formulations intended to reduce environmental impact, and the discovery of novel proteins that could lead to interesting and useful biomaterials. We look forward to seeing the important research that is being conducted in the field of protein-based materials!

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)
