Engineering, University of  
Padova, Padova, Italy

Deadline for manuscript  
submissions:

**closed (15 April 2023)**

### Message from the Guest Editors

Bioengineering is a discipline which deals with the application of engineering principles to problems of medical and/or biological interest. It allows to describe a process, a tissue, or a cell using an engineering approach, and to develop tools for diagnosis, therapy, and rehabilitation, involving different disciplines in physiological and pathological contests. In the last few decades, the fasciae have received huge interest from researchers and clinicians for their role in proprioception and motor coordination (deep fasciae), thermoregulation, lymphatic and blood circulation and exteroception (superficial fasciae).

This Special Issue, “The Role of Fascia in Pain Perception and Manual Therapy”, aims to publish the latest developments in the role of the different fasciae in pain perception with a major emphasis on the tools for diagnosis, on the mechanism of action of manual therapy with a difference between superficial or deep massage, on the bioimages analysis, and on the investigation of the mechanical behaviour. Original research, brief reports, and review articles are invited.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Engineering, Biomedical)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the first half of 2025).
