

Advances in Tissue Engineering and Regenerative Medicine

Guest Editors:

Dr. Andrea Paola Rodríguez

Prof. Dr. Élide B. Hermida

Dr. Leandro N. Monsalve

Deadline for manuscript
submissions:

closed (31 January 2023)

Message from the Guest Editors

Dear Colleagues,

We kindly invite and encourage the global research community to send their contributions on tissue engineering and regenerative medicine to this Special Issue.

Tissue engineering and regenerative medicine are major research topics among scientists from all around the world nowadays. They are a multidisciplinary field that applies principles from medicine, materials science, engineering, and molecular biology. Their main objective is the application of engineering techniques for the fabrication of biological substitutes with the ability of totally or partially regenerating impaired organs or tissues. Tissue engineering was initiated in the 1970s and has experienced major breakthroughs since then. However, the design and fabrication of cutting-edge porous scaffolds capable of promoting tissue regeneration and complete functional recovery in every tissue is still a challenge.

This Special Issue of *Bioengineering* on tissue engineering and regenerative medicine will allow experts from all around the world to gather and show the great potential of research and technological innovation in this field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Biomedical*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).
