

Special Issue

Engineering Mesenchymal Stem Cells for Regenerative Medicine

Message from the Guest Editors

Mesenchymal stem cells have emerged as a powerful tool in regenerative medicine due to their multipotency, immunomodulatory properties, and ability to secrete bioactive factors that promote tissue regeneration. This Special Issue focuses on the latest advancements in engineering MSCs to enhance their therapeutic potential, including genetic modifications, biomaterial integration, bioactive factor secretion, and improved protocols for their derivation from tissues, pluripotent stem cells, and direct reprogramming, as well as their characterization and differentiation. We aim to explore novel strategies that optimize MSC-based therapies, address challenges such as immune rejection and viability loss, and accelerate clinical translation. This Special Issue welcomes original research and comprehensive reviews on MSC-based biomaterials, mechanistic insights into MSC differentiation, engineered MSC therapies for specific diseases, advances in cell delivery and storage systems, and the role of secreted bioactive factors in tissue repair.

Guest Editors

Dr. Kyungsook Kim

Department of Biomedical Engineering, Jungwon University, Goesan-gun, Republic of Korea

Dr. Luis G. Villa-Diaz

Department of Biological Sciences, Oakland University, Rochester, MI 48309, USA

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
