Application of Bioengineering to Dentistry

Message from the Guest Editor

In order to promote innovation in the field of dentistry, it is necessary to develop not only conventional dental materials but also an emergent dentistry by incorporating advanced science and technology. In addition to biomaterials, the development of bioengineering technologies including proteins, cells, and genetic manipulation and their application to medicine are currently attracting significant attention. The development of new materials and technologies and their development into treatment methods is expected to lead to new breakthroughs and innovations in future dental practice. In this Special Issue, we invite various papers on the application of bioengineering to dentistry.

Guest Editor

Dr. Satoshi Komasa

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
