

Special Issue

Therapeutic Applications of Anti-Cancer Agents

Message from the Guest Editors

The newest approaches to targeted anti-cancer therapies include identifying cancer specific molecules, disrupting cellular pathways, and localizing cytotoxic agents to the tumor environment. This paradigm shift reduces the risk of toxicity and enhances efficacy. This Special Issue will focus on two broad areas: (i) bio-orthogonal chemistry based approaches, and (ii) smart biomaterial-based approaches. We welcome experts in these areas of research to share their knowledge and further the discussion on next generation anti-cancer therapeutics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
