

## Special Issue

# COVID-19 Diagnostic Strategies: Lessons for Current and Future Pandemic Threats

### Message from the Guest Editor

The coronavirus pandemic is the most challenging incident that humans have faced in recent years. The strategies exploited for detecting COVID-19 stem from the already designed systems for studying other maladies, particularly viral infections, teaching researchers and healthcare professionals that we need to enhance our readiness for future pandemics. The present Special Issue presents not only the novel advances in portable diagnostic devices for recognizing COVID-19, but also the previously existing biosensors for detecting other viruses and future threats. This Special Issue will consider the publication of research or review papers that address the challenges of developing diagnostic technologies for coronavirus disease 2019 (COVID-19) and other infectious diseases. This Special Issue will address the design, implementation, modelling, characterization, validation, and/or optimization and clinical testing of point-of-care diagnostic devices and test kits.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
