

Special Issue

Engineered Organic Electronics and Bioelectronics

Message from the Guest Editor

The rapidly emerging field of organic electronics and bioelectronics has witnessed the development of engineered conducting polymers (CPs) for low-cost, lightweight, and flexible organic electronic devices due to the needs and demands of the Internet of things (IoT), mobile and wearable sensors, and energy harvesting and storage. CPs possess extraordinary redox reversibility, and their biocompatibility and electrochemical properties have had a strong impact on advanced organic electronic devices. This Special Issue on “*Engineered Organic Electronics and Bioelectronics*” will, therefore, focus on original research papers and review articles dealing with cutting-edge technologies in engineered organic and hybrid organic materials. Topics of interest include (but are not limited to): material sciences, methodologies, engineering, and device integration for applications in such fields as sensors, biosensors, bionics, actuators (including controlled delivery systems), and organic capacitors and fuel cells.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Biomedical) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 3.1 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
