

## Special Issue

# Advances in Biomimetic Materials and Biomedical Devices

### Message from the Guest Editors

Biomaterial science involves the collaboration of many academic disciplines, including material science, chemistry, biology, biophysics, biomechanics, pharmaceutical science, tissue engineering, and medicine, to provide therapeutic solutions for treating, repairing, or replacing diseased tissues and organs. They are fundamental parts of drug delivery systems, from drug-eluting contact lenses to nanocarriers, and are the materials of choice in tissue engineering applications. In the last few years, massive developments have been made in the field of biomaterials, and research activities have led to improvements in the biomimetic features of designed tissue constructs and biomedical devices. This Special Issue will include original articles and reviews on the following topics: 3D bioprinting of organs and tissue constructs; Smart devices in the biomedical field; Drug delivery systems and routes of administration; 4D bioprinting for the fabrication of intelligent organs/tissues/devices; Nanotechnology for drug delivery; Stimuli-responsive materials and new chemistries in the biomedical area.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Bioengineering* (ISSN 2306-5354). *Bioengineering* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. *Bioengineering* provides an advanced forum for the science and technology of bioengineering. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Anthony Guiseppi-Elie

Department of Biomedical Engineering, Texas A&M University, College Station, TX 77843, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Biomedical)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
