Message from the Guest Editor

Dear Colleagues,

Proteomics, especially mass spectrometry (MS)-based techniques, offers comprehensive insights into global protein dynamics. Recent advancements in sample preparation, high-resolution MS instruments, and data analysis tools have enhanced the speed and sensitivity of proteome characterization. A detailed understanding of cellular signaling mechanisms associated with immune system activation is crucial.

This Special Issue, titled 'Proteomics in Immunology and Cell Signaling,' seeks original articles and reviews elucidating the impact of proteomics on advancing knowledge in immune system function and regulation. Emphasis is placed on cellular signaling events during immune system activation.

Topics of special interest include the following:

- Detailed understanding of the cell-signaling mechanisms of immune system activation, including quantitative proteome analysis as well as the global mapping of post-translational modifications like phosphoproteomics;
- Proteomics to characterise the role of extracellular vesicles in the immune response and intracellular signaling cascades;
- Immunopeptidomics;
- How proteomics can contribute to clinical research.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
