### Message from the Guest Editors

Dear Colleagues,

Radiation exposure is a major public health concern, with potential health consequences. Radiation can cause genotoxic damage to the genetic material (DNA) of living organisms and is particularly known for its ability to generate different types of DNA damage, including DNA single-/double-strand breaks, base alterations, and cross-links, among others.

Radiation-induced genotoxicity can lead to different health effects, including deterministic effects (such as acute radiation syndrome) and stochastic effects (such as cancer), mainly depending on the radiation dose and dose rate. In addition, the application of radiation in medicine, agriculture, and other fields has been greatly developed. Therefore, it is crucial to further understand the genotoxicity and health effects caused by various types of radiation to provide a theoretical basis for the development of radiation biology and its applications.

This Special Issue will provide a platform for researchers to share their latest achievements and new insights into radiation-induced genotoxicity and health effects.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
