Roles of RNA Regulation in Cancers

Guest Editors:

Prof. Dr. Chunjiang He

College of Biomedicine and Health, Huazhong Agricultural University, Wuhan 430070, China

Dr. Xiang Zhou

1. Fudan University Shanghai Cancer Center, Fudan University, Shanghai 200032, China
2. Institutes of Biomedical Sciences, Fudan University, Shanghai 200032, China

Deadline for manuscript submissions:

closed (10 September 2024)

Message from the Guest Editors

Dear Colleagues,

RNA regulation is a key regulatory mechanism in tumorigenesis and progression. RNA regulation includes transcriptional regulation, alternative splicing, and non-coding RNA regulation. This special issue focuses on how these important regulatory mechanisms affect the development of tumors, including but not limited to the following topics:

Transcription Factors and Tumors

non-coding RNA regulation

Alternative splicing and tumors

Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
