AGAP2 and AGAP2-AS1: Roles and Regulation

Guest Editor:

Dr. Cristina Montiel-Duarte

The John van Geest Cancer Research Centre, School of Science and Technology, Nottingham Trent University, Nottingham NG11 8NS, UK

Deadline for manuscript submissions:

closed (30 April 2022)

Message from the Guest Editor

This Special Issue is dedicated to furthering our understanding of a sense/antisense gene pair whose expression has been linked to cancer: AGAP2 and AGAP2-AS1. AGAP2 overexpression has been associated with several cancers including glioblastoma, prostate and breast cancer, and to fibrosis and cellular processes ranging from lipid metabolism to migration and cell proliferation. On the other hand, the expression of AGAP2-AS1 is gaining relevance in gastric, breast and lung cancer, hepatocellular carcinoma and glioblastoma, proving to be a good biomarker for some of these malignancies.

For this Special Issue, we encourage the submission of manuscripts encompassing all aspects of the regulation and role of AGAP2 and *AGAP2-AS1*. We accept reviews and short- and full-size research papers.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC. 46980 Valencia. Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
