## Antitumor and Metabolic Effects Mediated by PPARs

Guest Editor:

**Dr. Alessandra Ammazalorso**

Department of Pharmacy, G.  
d'Annunzio University, 66100  
Chieti, Italy

Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editor

Peroxisome Proliferator-Activated Receptors (PPARs) have been extensively studied as drug targets based on their metabolic regulatory activities in various tissues. Their roles in lipid and carbohydrate metabolism, energy homeostasis, inflammation, and cell differentiation make them interesting targets by which to restore altered metabolic functions in liver, muscle, adipose tissue, kidney, and brain.

In this context, this Special Issue will cover the latest developments in the physiological and pathological functions of PPARs in different organs, including their responses to nutrition and physical exercise. It will explore processes regulated by PPARs, either by natural or synthetic agonists or antagonists, affecting cellular and whole-organism metabolism.

Moreover, this Special Issue welcomes the submission of original research papers and reviews that cover multiple aspects of PPAR-mediated actions, including the modulation of signaling pathways in healthy and diseased organisms, the development of novel receptor ligands for of all three PPAR isotypes, and the structural biology of these nuclear receptors.

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
