Deadline for manuscript  
submissions:  
**closed (15 May 2022)**

### Message from the Guest Editor

Dear colleagues,

Biodiversity pattern is a key issue to establish sustainable environmental planning and wildlife conservation. Successful environmental policy seeking biodiversity conservation should consider patterns of biodiversity and its specific characteristics. Patterns in diverse scale— $\alpha$ ,  $\beta$ , and  $\gamma$  diversity—should be reflected in ecosystem management and planning. Particularly, information on species composition and its distribution can be used to establish optimum management strategy under diverse disturbances such as climate change, and human impact. Spatial analysis, field studies, statistical modeling, and other methodologies can be applied to evaluate biodiversity pattern. This Special Issue welcomes valuable findings and discussions regarding biodiversity patterns in diverse urban and natural environments.

Dr. Yoon Jung Kim

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
