## Craniofacial Development and Evolution

Guest Editor:

**Dr. Jennifer Fish**

Department of Biological  
Sciences, University of  
Massachusetts Lowell, Lowell, MA  
01854, USA

Deadline for manuscript  
submissions:

**closed (30 November 2022)**

### Message from the Guest Editor

The skull is a vertebrate novelty, the origin and diversification of which is associated with major evolutionary transitions, including the shift to a predatory lifestyle, the colonization of land, and the ability to masticate while breathing. The developmental, genetic, and epigenetic mechanisms contributing to or constraining craniofacial variation are not fully understood. Furthermore, the environmental and ecological context of development can impact both the form and function of the craniofacial structures, although much remains to be elucidated in this regard. This Special Issue will provide a broad overview of craniofacial development and evolution. We invite perspectives on the development, evolution, and/or morphological variation of any tissue or structure in the vertebrate head. Investigations of the mechanisms facilitating the evolvability and plasticity of the craniofacial structures are encouraged. Submissions may include both original research projects and reviews.

## Editors-in-Chief

### **Prof. Dr. Jukka Finne**

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### **Prof. Dr. Andrés Moya**

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
