Korea

Deadline for manuscript  
submissions:

**closed (15 December 2025)**

### Message from the Guest Editors

Dear Colleagues,

Biogeochemical cycling in plant-soil systems is crucial for ecosystem dynamics and services. Ecosystem dynamics encompass changes in structures caused by organism interactions with the environment. Services include functions like pollination and biomass production. Terrestrial plants are vital biomass producers and oxygen sources. Soil micro-organisms recycle elements, sustaining fertility for plant growth and services. Understanding these interactions is key to grasping ecosystem dynamics. Global change poses challenges, requiring effective management and policy. Research on biogeochemical cycling in plant-soil systems is invited, exploring questions such as:

- How does cycling impact terrestrial ecosystem dynamics and services?
- How do organisms interact in plant-soil biogeochemical cycling?
- How does global change affect cycling, impacting dynamics and services?
- How can management and policy mitigate global change effects?

We welcome theoretical approaches and studies, aiming to deepen our understanding of biogeochemical cycling and its implications for ecosystems in a changing world.

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
