Mechanobiology

Guest Editors:

Dr. Tae-Jin Kim

Department of Biological
Sciences, Pusan National
University, Pusan 46241, Republic
of Korea

Dr. Youhua Tan

Department of Biomedical
Engineering, Hong Kong
Polytechnic University, Hong
Kong, China

Deadline for manuscript
submissions:

closed (31 May 2021)

Message from the Guest Editors

Dear Colleagues,

Over the past few decades, mechanobiology has emerged at the interface of biology, medicine, biophysics, and bioengineering. Mechanobiology refers to the study of how biological components such as cells, tissues, and organs can sense and respond to mechanical cues to regulate numerous biological processes, including development, differentiation, physiology, and diseases.

This Special Issue invites authors to contribute original scientific reports, research articles, communications, and reviews that cover the recent advances in all aspects of mechanobiology.

Topics include but are not limited to the following:

- Mechanobiology in stem cells;
- Mechanobiology in cancer;
- Mechanobiology in physiology;
- Mechanobiology in nucleus (e.g., nuclear mechanics, gene/genome regulation);
- Mechanobiology in tissue development and homeostasis;
- Mechanobiology in health and disease;
- Cellular mechanosensing, mechanotransduction, and mechanoresponse;
- Biomechanics;
- Innovative approaches for mechanobiology research.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in
Molecular and Integrative
Biosciences, Faculty of Biological
and Environmental Sciences,
University of Helsinki, P.O. Box
56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology
Institute, University of Valencia
and CSIC, 46980 Valencia, Spain

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
